Eric,

Here's the attachment I was planning to send the Eco Team with the agenda for our Seattle meeting. As stated here, I think the Eco Team should have a discussion about it and come to some agreement on whether we think management objectives are needed. If we agree that they are (the ones Val proposed or others), we would forward our recommendation to the TCT for a larger group discussion/decision, since it does affect the HHRA and other parts of the RI/FS - as you rightly point out.
